

Claws at Eos Events

Character may use claws as weapons. These must pass a weapon's check with a referee. All claws must be checked on an individual basis, they must be constructed without a core and of a minimum 10cm of length. The claw length is measured from the tip of the fingers.

Claws must be constructed of foam or similar soft materials. All claws must fasten to the wearer's open hand. Claws made to be strapped over a clenched fist will not pass weapons check.

Claw users must be aware of how they use their claws and must have particular regard to not "body checking" and to avoid striking with anything other than the claws.

No Claw weapon will ever do more than one point of damage per strike.

There is nothing to stop claw users from using normal weapons.
